SUMMARY

Third-year B.Tech (CSIT) student with a 7.86 CGPA, specializing in full-stack web development with Python/Django and React. Experienced in building REST APIs, responsive frontends, and end-to-end web applications. Comfortable working with AI-assisted development tools to accelerate delivery while maintaining strong command over the underlying architecture and code.

TECHNICAL SKILLS

Languages: Python, C++, JavaScript

Backend: Django, Django REST Framework (DRF), REST API Design, SQL, PostgreSQL

Frontend: React.js, JavaScript, HTML5, CSS3, Tailwind CSS

Tools & Other: Git, GitHub, REST APIs, Firebase, AI-assisted development (Gemini, AI Studio)

EXPERIENCE

Web Development Intern — Cognifyz Technologies *June 2025 – July 2025*

- Contributed to real web development assignments, gaining hands-on exposure to professional workflows, with strong attention to detail and effective team communication.

PROJECTS

E-Commerce Full-Stack Web Application | *Django, DRF, PostgreSQL, React, Tailwind CSS*

[Live Demo](#) | github.com/raijaat250/ecommerce

- Built and deployed a full-stack e-commerce platform with a Django REST Framework backend (PostgreSQL) exposing RESTful APIs and a React (Vite) + Tailwind CSS frontend for a responsive shopping experience.
- Implemented core commerce features — user authentication, product catalog, cart, and order management — with a decoupled architecture separating the API and client layers.

FixMyArea AI — Civic Issue Reporting & Management Platform | *React, TypeScript, Tailwind CSS, Firebase, Gemini Vision API*

[Live Demo](#) | github.com/raijaat250/FIXMYAREA

- Built an AI-powered civic issue reporting platform for a hackathon (Vibe2Ship, Google AI Studio) that lets citizens pin issues on a map with a photo and get automatic AI triage.
- Integrated Gemini Vision API to automatically categorize reported issues and assign a severity score from uploaded images.
- Implemented real-time data sync and authentication using Firebase Firestore and Firebase Auth, powering live upvoting, comments, and status tracking.
- Developed an interactive Google Maps interface, a Gemini-powered chatbot assistant, and AI-generated action-plan/advocacy-petition features for citizen engagement.

CERTIFICATIONS & ACHIEVEMENTS

- Software Engineering Job Simulation — JPMorgan Chase & Co. (via Forage), Feb 2026 — completed practical tasks in Project Setup, Kafka Integration, H2 Integration, and REST API Integration/Controller design.
- Introduction to Cyber Security — Infosys Springboard, Apr 2026.
- Participant, Hacknovate 7.0 — 30-Hour International Hybrid Hackathon, ABES Institute of Technology, Ghaziabad, Apr 2026 (Team Code4Coders).
- Active problem solver on LeetCode — profile: leetcode.com/u/RAJDHARIWAL

EDUCATION

Ajay Kumar Garg Engineering College, Ghaziabad

B.Tech in Computer Science & Information Technology (CSIT) — 3rd Year **CGPA: 7.86**
